Celina is a licensed architect with 16 years of experience performing as project manager and later on as technical project architect. She is best known for her educational facility planning and design, but since joining BREEN in 2017, she has widened her architectural expertise in numerous small to large-scale mixed-use, commercial and multi-family residential project types. Celina is well-versed in the regulatory process with local agencies and the Division of the State Architect. Her commitment to serving our client's design goals is reflected by her hands-on and highly detailed approach to projects, from early planning and design concept, construction documents through construction. Celina spearheads BREEN's quality control and quality assurance program and is a leader when it comes to coordinating consulting engineers of all disciplines. She strives to provide practical yet creative solutions with care and dedication in order to deliver a successful project for our clients and community stakeholders.
